VOLUME 69

	Page
Index	3
Contents	19

No. 1, January/February	Protocol Testing and Verification
No. 2, March/April	Software Productivity
No. 3, May/June	Design for *X*
No. 4, July/August	Striving for Manufacturing Excellence
No. 5, September/October	Speech Technologies
No. 6, November/December	Materials and Processing

AT&T TECHNICAL JOURNAL (ISSN 8576-2324)
is published six times a year by AT&T. Current price of individual subscriptions:
U.S.—1 year $50; 2 years $90; 3 years $120
Foreign—1 year $64; 2 years $118; 3 years $162.

Payment for foreign subscriptions must be made in U.S. funds, or by check drawn on a U.S. bank, and made payable to the *AT&T Technical Journal*, and sent to AT&T Bell Laboratories, Circulation Group, Room 1B-413, 101 J. F. Kennedy Pkwy, P.O. Box 1101, Short Hills, NJ 07078–0996.

Current or recent issues may be obtained by writing to the Circulation Group or calling (201) 564-2582. You may obtain back issues from the AT&T Customer Information Center, P.O. Box 19901, Indianapolis, IN 46219, or by calling (800) 432-6600. From outside the U.S. call (317) 352-8557. Photocopy or microform reprints from the *Journal* are available by writing to University Microfilms International, 300 N. Zeeb Road, Ann Arbor, MI 48106, or calling (800) 521-0600. From outside the U.S. call (313) 761-4700.

Speech technologies
algorithms, **69–5** (1990), 14–24, 77–86
Application of Memory-Based Digital Filtering to High-speed Digital Radio, **69–5** (1990), 100–115
AT&T Voice Processing System Architectures, **69–5** (1990), 52–60
AUDIX Voice Power, **69–5** (1990), 52–60
Autoplex cellular telecommunications system, **69–5** (1990), 77–86
Coding of Speech and Wideband Audio, **69–5** (1990), 25–41
Conversant voice information system, **69–5** (1990), 14–24, 42–76
digital-cellular telephone system, **69–5** (1990), 77–86
foreign language capabilities, **69–5** (1990), 77–86
human-machine network (HuMaNet) communication, **69–5** (1990), 87–99
HuMaNet: An Experimental Human-Machine Communications Network Based on ISDN Wideband Audio, **69–5** (1990), 87–99
integrated access and cross-connect system, **69–5** (1990), 77–86
intelligent networks, **69–5** (1990), 77–86
Interactive Voice Technology Applications, **69–5** (1990), 61–76
Novel Applications of Speech Processing in AT&T Network Systems Products, **69–5** (1990), 77–86
operator services, automation of, **69–5** (1990), 77–86
Speech Processing: A Perspective on the Science and Its Application, **69–5** (1990), 2–13
Speech Recognition: From the Laboratory to the Real World, **69–5** (1990), 14–24
speech-noise distinction, **69–5** (1990), 2–13
speech reconstruction, **69–5** (1990), 42–51
stored-voice technology, **69–5** (1990), 42–51
text-to-speech conversion, **69–5** (1990), 42–51
Voice Response Systems: Technologies and Applications, **69–5** (1990), 42–51
voice-messaging system, **69–5** (1990), 52–60
wideband packet network, **69–5** (1990), 77–86
Standards, protocols, **69–1** (1990), 4–16, 45–59, 84–128
Stark effect, quantum confined, **69–6** (1990), 77–91
Statistical model-fitting, **69–3** (1990), 46–60
Stored-voice technology, **69–5** (1990), 42–51
Storeroom operations, Denver Works, **69–4** (1990), 81–89
Storrs, Robert D., **69–4** (1990), 81–89
Striving for Manufacturing Excellence, **69–4** (1990), 2–4
Striving for Manufacturing Excellence at the Denver Works: A Summary, **69–4** (1990), 5–18
Surface-emitting lasers, **69–6** (1990), 77–91
Svitak, John J., **69–4** (1990), 64–80
Switched Access Remote Test System *See* SARTS
Switching technology, electro-optic, **69–6** (1990), 77–91
Synchronization protocols
algorithms, **69–1** (1990), 119–128

C programming language, **69–1** (1990), 119–128
conformance test system, **69–1** (1990), 84–100
pattern, **69–1** (1990), 7–16
program transformation, **69–1** (1990), 119–128
Syrdal, Ann K., **69–5** (1990), 42–51

T

Taguchi's design method, **69–3** (1990), 46–60
Tai, King L., **69–6** (1990), 46–59
Telecommunications system *See* Definity telecommunications system
Testing, protocols
algorithms, **69–1** (1990), 2–3, 32–44, 60–128
application layer, **69–1** (1990), 84–100
common management information protocol (CMIP), **69–1** (1990), 84–100
conformance, **69–1** (1990), 2–128 *Also see* Conformance testing
coordination-specification analysis, **69–1** (1990), 45–59
deterministic execution, **69–1** (1990), 101–118
finite-state machine model, **69–1** (1990), 2–3
interoperability, **69–1** (1990), 7–16
languages, **69–1** (1990), 45–83, 101–118
message tests, **69–1** (1990), 7–16
specifications, **69–1** (1990), 2–16
Testing, large-scale integrated circuits
bed-of-nails technique, **69–3** (1990), 97–109; **69–4** (1990), 64–80
built-in self-test (BiST), **69–3** (1990), 97–109
chip-level test, **69–3** (1990), 97–109
standards, **69–4** (1990), 64–80
traditional systems, **69–3** (1990), 97–109; **69–4** (1990), 64–80
Tewani, Kamlesh T., **69–1** (1990), 7–16
Text-to-speech conversion, **69–5** (1990), 42–51
Theis, Ellen M., **69–3** (1990), 14–27
Thermophoresis, **69–6** (1990), 92–100
Thin-film deposition, **69–6** (1990), 101–112
Thompson, Larry F., **69–6** (1990), 32–45
Thorkildsen, Reed, **69–5** (1990), 77–86
TOPAS (Trunk Operations Provisioning Administration System), **69–1** (1990), 45–59
Total quality control (TQC)
circuit packs, **69–4** (1990), 64–80
coordination, **69–4** (1990), 2–4, 53–63
implementation, Denver Works, **69–4** (1990), 53–63
just-in-time system, **69–4** (1990), 2–4, 53–63 *Also see* Just-in-time (JIT) manufacturing
metrics, **69–4** (1990) 53–63
team concepts, case studies, **69–4** (1990), 53–63
Toward a Software Information System, **69–2** (1990), 22–41
Toxicity, silicon materials, **69–6** (1990), 101–112
Trunk Operations Provisioning Administration System *See* TOPAS
